

Green Building Audit Service

Church Extension's energy audit is designed to help congregations identify and implement environmentally friendly ways to operate using less energy. The energy audit focuses on the stewardship of resources and how congregations can increase funding for ministry by decreasing their energy costs.

Church Extension's comprehensive energy audit includes:

- Church Structure and Design
- Energy Use and Demand
- Building Site and Grading
- Heating, Cooling and Ventilation
- Water Heating and Distribution
- Building Use
- Insulation Systems and Ratings
- Church Financial Analysis – Operational and Capital
- Congregational Ministry Planning
- Building Planning
- Additional Green Programs
- Energy Cost Per Square Foot Comparison
- Geographical Location and Recommendations

After you return this request form and your Green Building Audit has been scheduled, Church Extension will need the following information regarding your congregation:

1. Energy use data for three years (a sample Excel spreadsheet will be provided)
2. The annual income/expense reports for the past three years and a current balance sheet (including all financial assets)
3. History and membership survey
